

Good brands. Better together.

Purposeful products. Meaningful partnerships. Explore a thoughtful way to connect your brand with Bengal Bytes across our websites, ad-supported apps, Facebook Page, and physical promotional cards.

SMALL STUDIO. CONNECTED POSSIBILITIES.

05 published Android apps

03 connected web destinations

WHO WE ARE

Built in Bangladesh. Open to the world.

Bengal Bytes is a purposeful software studio founded in 2026, based in Bogura, Bangladesh. We build useful, privacy-first tools across documents, AI, business operations, and Bengali heritage.

This kit describes partnership possibilities, not booked inventory. No guaranteed reach, traffic, conversions, or fixed rates are published. Availability and technical fit are confirmed in a written proposal.

Seven ways to connect. One shared purpose.

01 / BRAND

Brand sponsorship

Co-branded campaigns, partner recognition, and longer-term multi-channel brand collaborations.

02 / DIGITAL

Website sponsorship

Clearly labeled sponsor cards and contextual placements across the apps catalogue, code marketplace, and studio website.

03 / DIGITAL

In-app opportunities

Explore app-specific placements in ad-supported products, subject to technical and policy review. NexBiz is currently ad-free.

04 / PHYSICAL

Promotional cards

Co-branded printed cards and QR-to-web journeys. Design, quantities, print costs, distribution sites, and schedule are scoped together.

05 / SOCIAL

Facebook sponsorship

Sponsor our Page cover, a co-branded profile image, or clearly disclosed posts. Display dates, post scope, Meta policies, and reporting are agreed. Paid boosting is separate.

06 / COMMUNITY

Content & community

Useful product stories, educational collaborations, and joint launch campaigns. Editorial fit and sponsorship disclosure come first.

07 / CUSTOM

Custom partnerships

Product integrations, cross-channel packages, event ideas, and collaborations that do not fit a standard format.

Useful products. People with purpose.

DocQR

DOCUMENTS & SCANNING

PDF scanning, OCR, QR tools, and AI document utilities.

Ad-supported

DocQR Lite

LIGHTWEIGHT PRODUCTIVITY

Practical PDF and QR utilities for lighter Android devices.

Ad-supported

NexAI

AI & PRODUCTIVITY

Nine AI providers in one client with a bring-your-own-key workflow.

Ad-supported; beta

NexBiz

BUSINESS & COMMERCE

Offline inventory, ledgers, billing, and business invoices.

Currently ad-free; no active sponsor ad inventory

Bengal Heroes

CULTURE & LEARNING

Bengali heritage, history, and daily quizzes.

Ad-supported

OUR WEB DESTINATIONS

The studio, its philosophy, and the team

Facts based on the studio's published websites, reviewed 15 October 2026. App installs are not monthly users or guaranteed advertising reach.

Your goals. Our shared plan.

01 / SAY HELLO

Tell us your idea

Share your brand, objectives, preferred channels, timing, and indicative budget. You do not need a finished campaign.

02 / PLAN WITH CARE

Find the right fit

We review relevance and availability, then agree on scope, creative, duration, pricing, payment terms, usage rights, and supported reporting.

03 / CREATE TOGETHER

Make it happen

Review creative, confirm the written scope, and launch through the agreed process. Print runs and distribution are confirmed before physical production.

OUR PARTNERSHIP PRINCIPLES

Relevant by design. Clearly disclosed. Respectful of privacy. No deceptive claims, gambling, adult content, or predatory financial offers. No unverified promises of audience size or conversions.

Let's start a conversation.
